

## Why we're changing the timetable

Many things in our world have changed. Like the way we work, the way we meet and the way we travel. And it's time we changed too.

So, on December 11th we're introducing a brand-new timetable across our network.

The changes will mean:

- A more consistent timetable throughout the day
- More trains on time

Make the 11th December the date to remember.

# All<sup>th</sup> change

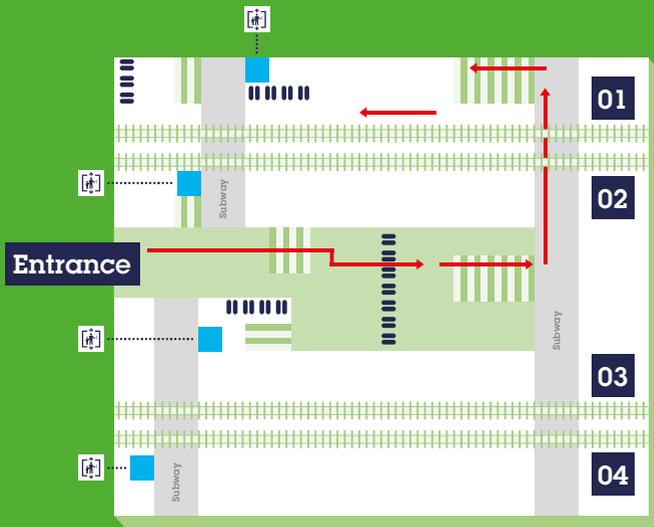

at Lewisham

On December 11th we're introducing a brand-new timetable across our network to improve punctuality and reliability.

More trains will be on time, and to do that we're reducing the number of trains crossing one another at busy junctions. This means that some additional customers will now change trains at Lewisham, so a revised one-way route for platform 1 will operate in the morning peak to improve customer flow through the station, increasing the safety of our customers.

### Travelling from Lewisham

- Customers using the stairs and subway for platform 1, please enter the station via the main station entrance.
- The DLR entrance to platform 1 will become exit only to help reduce congestion in this area.
- Customers for the lifts should make their way to them as usual.

### Exiting Lewisham station

- Customers arriving on platform 1 and exiting the station or requiring the DLR should use the gated stairway to the subway to exit.
- Customers for the lifts should make their way to them as usual.
